

Eclipse RCP Migration Workshop

In this migration workshop you learn how to migrate your existing Eclipse 3.x RCP Application to an Eclipse 4.x Application. The agenda gives a rough guide, but it can vary according to your needs and project.

- **Code review**
 - Analysis of the existing code basis
 - Identification of minimal migration scope
 - Code cleanup requirements before the migration

- **Prototype migration**
 - Using the compatibility layer
 - Menu and toolbar entries
 - Views
 - Editors
 - Perspectives
 - Other areas

- **Workplan**
 - Definition of migration steps
 - Identification of gaps for the migration
 - Shared rework of the code basis

- **Tips and tricks**
